ALS families just like yours are  
helped every day

Mr. O is a husband and a father of 3 school age children. His ALS progressed very quickly and took a tremendous toll, financially and emotionally. Trained as a pharmacist, he is no longer able to work and support his family as he had hoped. There are no other family members living nearby... Mr O requires 24 hour a day care. Mrs. O, the only family member trained to care for her husband, has been unable to leave his side. Both are missing out on the children's activities and sporting events.

The O Family received a Grant  
for in-home health care in 2015
